MAXI MARINE CHRONOGRAPH

Frauscher

ULYSSE NARDIN and FRAUSCHER Shipyard

Innovation, tradition and craftsmanship. The result of the synergy of these characteristics is an exclusive timepiece combining the passion for producing highly coveted timekeepers and fine yachts.

The significant nautical history of Ulysse Nardin inspired the Frauscher shipyard to present one of our precious timepieces, the Maxi Marine Chronograph as an own watch – a fusion of watches and boats.

A rugged all weather sports chronograph with a self-winding movement which records the seconds and minutes and can be put to zero instantly over two pushers.

The case, with a screw-crown and screw-pushers, crafted in stainless steel, is water-resistant to 200 meters and fitted with an exhibition case back. Each timepiece has its own plate fixed on the side of the case with the engraving of the individual number of the Frauscher yacht.

The passing of time has been kind to the famous Austrian shipyard. Since 1927 the family company in its 3rd generation today, resisted the temptation to rest on past achievement. The same spirit of innovation as Ulysse Nardin allows today the production of beautifully handcrafted boats and yachts.

Both companies, Ulysse Nardin as well as Frauscher stand out for their tradition including the bravery in using new technologies and the strength and power to produce exclusive and unique products.

The exclusive Ulysse Nardin Frauscher Marine Chronograph is directly available at the Frauscher shipyard at the price of Euro 5.200,-.
